

Your Name

Software Engineer | AI Researcher | Product Builder

you@example.com | LinkedIn | GitHub | Portfolio

Summary

Highly motivated software engineer with experience in AI systems, full-stack development, and scalable automation workflows. Passionate about building impactful products and solving complex problems.

Experience

Software Engineer Intern

May 2025 – Aug 2025

Company Name

- Built scalable APIs using Node.js and PostgreSQL.
- Improved application performance by 35% through query optimization.
- Collaborated with cross-functional teams to ship production features.

AI Research Assistant

Jan 2024 – Present

University Lab

- Developed ML pipelines for autonomous systems research.
- Worked on simulation tooling and dataset preprocessing.
- Published findings in collaborative academic projects.

Education

University Name

2023 – 2026

B.S. in Computer Science

Relevant Coursework: AI, Systems Design, Algorithms, Databases

Projects

AI Workflow Automation Platform

2025

- Designed multi-agent workflows integrating Gmail, Drive, and Calendar.
- Built intelligent task routing and automation pipelines.
- Implemented scalable backend services and dashboard interfaces.

Skills

Python

TypeScript

React

Node.js

PostgreSQL

AWS

Machine Learning

Docker
